WANTED

Dr Jose Delgado

"We need a program ... for political control of our society. The purpose is physical control of the mind. Everyone who deviates from the given norm can be ... mutilated. The individual may think that the most important reality is his own existence, but this is only his personal point of view. This lacks historical perspective. Man does not have the right to develop his own mind. This kind of liberal orientation has great appeal. We must electrically control the brain. Some day armies and generals will be controlled by electric stimulation of the brain."

— Dr. Jose Delgado, a publicly-funded pioneer of the technology of Electrical Stimulation of the Brain (ESB); his remarks as they appeared in the February 24, 1974 edition of the Congressional Record, No. 262E, Vol. 118
